

Outcomes and Efficiency with Comprehensive Testing

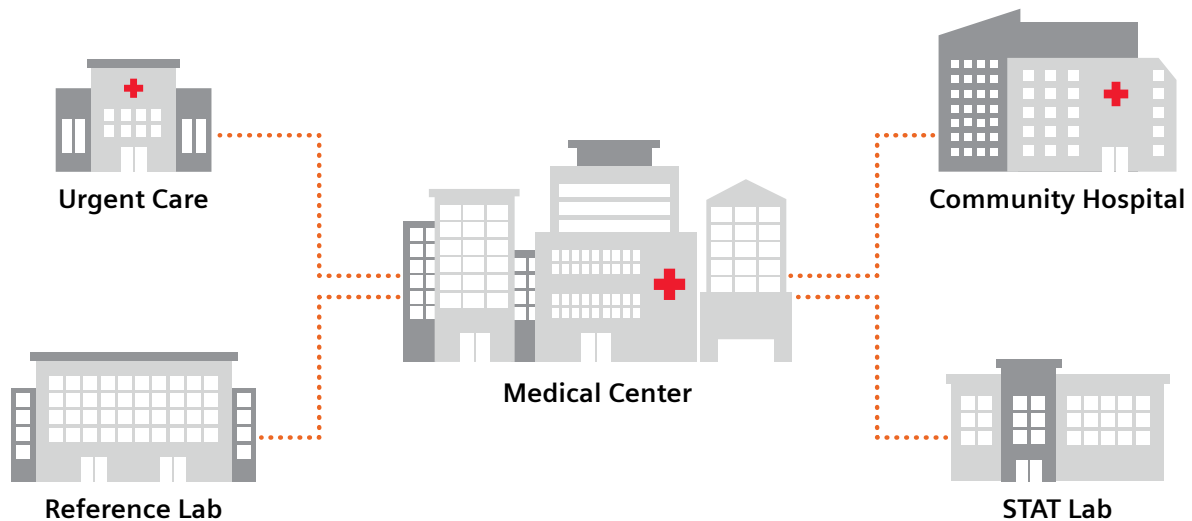

A broad spectrum of testing to support outcomes and efficiency throughout the healthcare system

[siemens-healthineers.com](https://www.siemens-healthineers.com)

For nearly every type of disease, a broad portfolio of tests that deliver accurate, clinically relevant results, at all access points for patient testing.

Test comprehensively. Test efficiently. Test confidently.

Featuring more than 200 available assays, you can produce fast, accurate testing results while optimizing clinical operations with the Siemens Healthineers in vitro diagnostics portfolio. Consolidated and dedicated platforms can be used to create workflows tailored to the needs of your patient population. From STAT tests in the ED to A1c monitoring and detecting SARS-CoV-2 immune response, service of your full network of care.

Diagnosing and treating these conditions can impact many different areas within hospitals and across health networks. Likewise, the key benefits of our assays for detecting and monitoring these disease states can be felt beyond the laboratory environment, giving you the tools to strengthen support for stakeholders throughout your facility and network.
